

antibody engineering methods and protocols methods in molecular biology

So, 02 Dez 2018 09:18:00 GMT antibody engineering methods and protocols pdf - Monoclonal antibodies (mAb or moAb) are antibodies that are made by identical immune cells that are all clones of a unique parent cell. Monoclonal antibodies can have monovalent affinity, in that they bind to the same epitope (the part of an antigen that is recognized by the antibody).
